JOB LISTING PLATFORMS

India-only portals + remote jobs from India and global employers

Curated list for a Data Analyst / Business Analyst / BI Analyst job scraper built with Google Antigravity.

How to use this directory
Use Section A for jobs based in India. Use Section B for remote roles that may accept candidates in India. Use Section C to monitor employers directly.
Important for your scraper
A global remote job is not automatically open to Indian applicants. Verify the location eligibility in each posting. Use official APIs, authorized feeds, or permitted collection methods; do not bypass logins, CAPTCHAs, or anti-bot controls. Check current terms, API limits, and service availability before integrating a source.

A. India-only job listing platforms

General job portals

Platform	Website
Naukri	https://www.naukri.com/
LinkedIn Jobs (India filter)	https://www.linkedin.com/jobs/

Swiggy Careers	https://careers.swiggy.com/
Zomato Careers	https://www.zomato.com/careers
Razorpay Jobs	https://razorpay.com/jobs/
PhonePe Careers	https://www.phonepe.com/careers/

Suggested scraper priority

• Start with sources offering documented APIs or permitted feeds, such as Adzuna, Remotive, and public employer ATS listings where allowed.

• Add India-specific boards after checking official access options and each site's terms.

• Track source status, last successful scan, original posting date, last-seen date, and original application URL.

• Deduplicate by source job ID and canonical URL; use cautious matching for title, company, and location.

• Keep the source registry configurable so sources can be enabled or disabled without changing application code.

This is a curated starting list, not a guarantee that every platform has a public API or allows automated scraping. Links and service status can change.
